SYLLABUS

COURSE DESCRIPTION

PSYC111W Psychology (3 Credits)
This is an introductory course which surveys the behavioral science of psychology. Personal and social behaviors are explored through such topics as: consciousness, memory, learning, perception, physiology, sexuality, cognition, abnormal behavior and developmental processes. Applied research assignments are an integral component of this course. Emphasis is placed on analyzing data, and critically examining theories and trends in the field.

PREREQUISITES
None, but ENG120 College Composition (or equivalent) is suggested

REQUIRED TEXTS AND RESOURCES
COURSE LEARNING OUTCOMES

Upon completion of this course, students will be able to:

1. define psychology, specifically within the context of demonstrating that psychological investigation meets the criteria of being a legitimate scientific discipline
2. critically argue and document how the methods of research used by psychologists are mathematically and scientifically valid, while still adhering to ethical standards
3. identify the functions of the major components of the central and peripheral nervous system
4. identify the major branches of psychology, and describe the primary focus of each branch
5. explain the relationships between heredity and environment, and how these two influences, both individually and in combination, manifest in psychological phenomena
6. describe the psychological importance of sleep, and identify sleep disorders and their causes
7. research current theories regarding how learning takes place and memory is created in the central nervous system
8. identify different types of intelligence, present arguments for the importance of recognizing each type of intelligence, and describe the ways that psychologists measure each different types of intelligence
9. identify in physiological terms the relationship between sensory perception and its interpretation, and how differences in sensory perception and its interpretation in the central nervous system may shape psychological phenomena
10. describe specific examples of neural and hormonal influences on behavior
11. identify and define major recognized psychological disorders, and list symptoms and
potential treatments of each disorder
12. differentiate between clinical behavioral disorders and “normal” eccentricities
13. provide the mechanisms by which emotional stress may produce physiological disorders
14. identify and describe personality assessment tools, and critique their accuracy
15. provide “real world “examples from past and current events, of how the concepts of social psychology manifest themselves in human interaction
16. describe the physiological mechanisms that may contribute to aggressive behavior in humans

METHODS OF INSTRUCTION/LEARNING ACTIVITIES:

The course will use textbook readings as the primary basis for students’ preparation for the bi-weekly tests. Students are permitted and encouraged to use additional outside sources to assist them in completing and learning from the tests. Students will be permitted two attempts for each test, retaining the higher score.

Students are expected to leverage multiple on-line resources to further investigate topics introduced in the textbook readings, and use researched information to provide original, insightful perspectives of each research assignment. It is expected that students will expand their understanding of pivotal and evolving psychological investigation via online research, with the intent to broaden each topic beyond what is presented in the textbook.

METHODS OF ASSESSMENT:

<table>
<thead>
<tr>
<th>Graded objects:</th>
<th>Points:</th>
<th>Percent of Grade:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Research assignments</td>
<td>6 @ 50 points each = 300</td>
<td>52%</td>
</tr>
<tr>
<td>Bi-weekly tests on assigned readings</td>
<td>7@ 40 points each = 280</td>
<td>48 %</td>
</tr>
<tr>
<td>Total</td>
<td>580 points</td>
<td>100%</td>
</tr>
</tbody>
</table>

*Standardized Grading Scale:*

- A      93.33 – 100.00
- A-     90.00 – 93.32
- B+     86.67 – 89.99
- B      83.33 – 86.66
- B-     80.00 – 83.32
- C+     76.67 – 79.99
- C      73.33 – 76.66
C- 70.00 – 73.32
D+ 66.67 – 69.99
D 63.33 – 66.66
D- 60.00 – 63.32
F Below 60.00

COURSE EXPECTATIONS:
In college-level courses, instructors have common expectations of their students: specifically, that students have a high degree of self-motivation, that students have a personal interest in learning the material that the course addresses, and that students, as responsible learners, are highly respectful to one another. It is also expected that students possess basic competence in the functional use of digital technology. The following list includes other common expectations, specifically that students:

- Have easy, continuous access to a computer
- Have access to the Internet, preferably via a high-speed connection
- Be able to search for credible information online, have some facility for narrowing searches, and begin to differentiate among the levels of “legitimacy” of online information
- Use word processing software (Microsoft Word, or Open Office Writer are preferred)
- Be able to compose, send, receive, and reply to emails related to their courses, and track their email correspondence
- Know how to attach files to emails and discussion board posts when appropriate
- Be capable of downloading and opening files, manage stored files, and recognize the characteristics of popular computer file types

POLICIES
Students registered for WMCC courses must comply with all policies and guidelines in the Student Handbook and other college publications, including those related to civil rights, disabilities services, harassment, and plagiarism. For more information, refer to http://www.ccsnh.edu/online-learning-policies

Academic Integrity and Plagiarism
Students must abide by the academic-honesty policy as defined in WMCC’s Student Handbook.

Discrimination Policy
White Mountains Community College does not discriminate in the administration of its admissions and educational programs, activities, or employment practices on the basis of race, color, religion, national origin, age, sex, disability, political affiliation, veteran status, sexual orientation, gender identity or expression, or marital status. This statement is a reflection of the mission of the Community College System of NH and White Mountains Community College and refers to, but is not limited to, the provisions of the following laws:

- Title VI and VII of the Civil Rights Act of 1964
- The Age Discrimination Act of 1967
- Title IX of the Education Amendment of 1972
- Section 504 of the Rehabilitation Act of 1973
- The Americans with Disabilities Act of 1975
- Section 402 of the Vietnam Era Veteran's Readjustment Assistance Act of 1974
- NH Law Against Discrimination (RSA 354-A)

Inquiries regarding discrimination may be directed to Melissa Laplante, Room 309, at mlaplante@ccsnh.edu or 603-342-3086, Berlin Campus or Melanie Robbins Director of the Academic Centers, at mrobbins@ccsnh.edu or (603) 342-3093; or to the CCSNH Title IX Coordinator, 26 College Drive, Concord, NH 03301, (603) 230-3500. Inquiries may also be directed to the US Department of Education, Office of Civil Rights, Region 1, 1875 JFK Federal Building, Boston, MA 02203, (617) 565-1340; the NH Commission for Human Rights, 2 Chenell Drive, Concord, NH 03301, (603) 271-2767; and/or the Equal Employment Opportunity Commission, JFK Federal Building, Boston, MA 02203, (617)565-3200.

**Netiquette**

Students must obey [CCSNH Netiquette](http://www.ccsnh.edu/students/netiquette-at-ccsnh) as articulated on the CCSNH website:

http://www.ccsnh.edu/students/netiquette-at-ccsnh

**Participation and Attendance**

**Online Course Attendance**

Attendance in online education is vital to the success of the course. Students must actively participate in the online course room at least two times during the add drop period. If students do not adhere to the online education attendance policy they will be automatically dropped from the class.

In a distance education context, documenting that a student has logged into an online class is not sufficient, by itself, to demonstrate academic attendance by the student. A school must demonstrate that a student participated in class or was otherwise engaged in an academically related activity, such as by contributing to an online discussion or initiating contact with a faculty member to ask a course-related question.

Examples of acceptable evidence of academic attendance and attendance at an academically-related activity in a distance education program include:
• student submission of an academic assignment,
• student submission of an exam,
• documented student participation in an interactive tutorial or computer-assisted instruction,
• a posting by the student showing the student's participation in an online study group that is assigned by the institution,
• a posting by the student in a discussion forum showing the student's participation in an online discussion about academic matters, and
• an e-mail from the student or other documentation showing that the student initiated contact with a faculty member to ask a question about the academic subject studied in the course.

Communication
Modules will identify assigned research assignments and upcoming tests. They will indicate the due dates for assignments and tests. Students should read those descriptions very carefully, since they contain critically valuable information for successfully addressing each unit's graded objects.
There will be additional announcements posted regularly throughout the term. These announcements will address topics to assist students with other course-related issues or identify “exceptional” events in the courses' progression.
Course distribution-list emails will be sent out, usually once a week, to remind students of unit obligations, and/or issues unique to that week's works.
Emails to individual students will be sent on an as-needed basis.
If a student has issues that cannot be resolved effectively by email, they will be invited to provide a phone number for a follow-up phone conversation.

Instructor's Grading Policy and Timeframe
Research papers are due by the end of the two-week period in which they are assigned, though they may be submitted earlier within that period. Instructor will grade and provide constructive feedback for all submitted papers.
Tests are due within the two-week period for which they are assigned, auto-graded, and scores will appear in the Canvas Gradebook, usually within an hour of submitting a unit test (or its re-take.)

Late Work, Revisions, and Extra Credit
Research papers and tests must be submitted by their latest due date. Students will be reminded to take advantage of the two-week window for each and thus not risk missing the deadlines.

Incomplete Grades
An Incomplete Grade (I) indicates that a student has not completed a major course assignment (usually a final exam or culminating final assessment) because of extraordinary circumstances, such as serious illness, death in the family, or the like. The grade is applied only in those instances when the student has a reasonable chance of passing. It is not used to give an extension of time for a student delinquent in meeting course responsibilities.
The work must be completed by the student through formal arrangement with the instructor no later than:

- The end of the third week in the spring semester for a grade issued in the fall semester
- The end of the third week in the fall semester for a grade issued in the summer term
- Three weeks from the earliest start date of the summer term for a grade issued in the spring semester

Should the student fail to complete the work within the designated period, the grade will automatically become an F. The Vice President of Academic Affairs may make exceptions to the above deadlines.

Incomplete grades will not be included in the computation of Grade Point Average. An incomplete grade may affect a student’s financial aid. Students should contact the Financial Aid office on their campus for further information.

**Online Participation**

As an on-line course, students enjoy some flexibility in determining when to submit assigned research papers and take tests. But as detailed in the section of this syllabus that addresses late work, it is obligatory that these graded objects be completed by their respective deadlines. For that reason, it is critically important that students read the course syllabus, all relevant posted announcements, and emails of each weekly unit to avoid the compromise of grade and learning that occurs from succumbing to a “just in time” strategy for submitting course work.
